SIGN UP · SANITY STUDIO

CMS team guide

How to add a project, how to edit one, and what every field is for. Written for the Sign Up team — not for developers.

> **Open Studio:** go to `/studio` on the website (on a computer: `http://localhost:3000/studio`). After every change, click **Publish**. If you only type and leave, the live site does not update.

1. Remember these four things

1. An empty field keeps the site's current default text or photo. Empty does **not** delete a section.
2. When you change a sentence, fill **English and Arabic**.
3. You can add, edit, and delete **Projects**. There are many of them.
4. **Homepage, About, NFC page, Store page, Intro & showreel** are one document each. Edit them. Do not try to create a second Homepage.

2. What you see on the left

Sidebar item	What it is	Can you add another?
Intro & showreel	Home intro video + showreel film	No — edit only
Homepage	Home titles, numbers, partners, services text	No — edit only
About	About page text, founder, milestones	No — edit only
NFC page	NFC page text, product photos, which 1–2 cases show	No — edit only
Store page	Store titles, filter names, the 12 product tiles	No — edit only
Projects	Every work case on `/projects`	**Yes** — one document per case

3. How to add a project

Use this when you have a new case for `/projects` (and for `/nfc` if it is NFC Card, Ring, or Medal). The form is short on purpose: name, service, cover first. Sentences and list order start closed.

1. Open Studio and sign in.
2. Click **Projects** on the left.
3. Click **+** or **Create** (top of the list). A new empty project opens. Do not open Homepage for this.
4. Type **Project name**.
5. Pick **Service** from the list (Brand Identity, Packaging, Videos, NFC Card, …). You cannot type a new service.

6. In **Cover**, upload the opening photo (image only). If Service is **Videos**, upload the film here instead, and add a **Video thumbnail** if you have a still.
7. Optional: **Extra photos** — click **Add item** for each extra chapter. Each item is a photo + which chapter it is.
8. Optional: **Short description** — one or two lines under the name. Leave empty to keep the default line.
9. Optional: open **Sentences (optional)** only if you want to change the default English/Arabic lines.
10. Optional: open **List order (optional)** to change **Order on Projects page** (smaller number = higher in the list).
11. Click **Publish**.
12. Check the live site: `/projects`, the same filter as Service, then open the case. If it is NFC, also check `/nfc`.

> **Minimum to publish:** Project name + Service + Cover.

4. What each project field is for

Field in Studio	What it does	If you leave it empty
Project name	Title on `/projects` and on the journey page. Required.	You cannot publish without it.
Service	Which filter the case sits under. Required. Pick from the list only.	You cannot publish without it.
Cover	Opening photo (image upload). If Service is Videos, film upload instead. Required. You may paste a URL.	You cannot publish without it.
Video thumbnail	Still image before the film plays. Only appears when Service is Videos.	Site default still, or none.
Extra photos	Each item is one extra chapter. Photo + chapter name. Hidden when Service is Videos.	Only the cover chapter shows.
Short description	One or two lines under the name on the site.	The default line for that service stays.
Sentences (optional)	Starts closed. Cover line and chapter sentences (English + Arabic).	Built-in default sentences stay.
List order (optional)	Starts closed. **Order on Projects page** — smaller number = higher up. Does not add photos.	Treated as 0.

Inside Cover (and any photo/video field)

Studio only shows the upload that matches the field. You do not see image and video together unless both are needed.

Field	Use it when
Upload image	Cover (non-Videos), Extra photos, video thumbnail, intro poster.
Upload video	Cover when Service is Videos, homepage intro loop, showreel.
Or paste a URL	The file is already online. Leave empty if you uploaded above.

Inside each Extra photo

Field	What it does
Photo	The image (or a URL). Required for that extra item.
This photo is for	Which chapter (Logo, In hand, Poster, …). If empty, Studio uses the next empty chapter for this service.
Photo label	Small caption on the photo. Not the chapter headline.
Replace sentences on this photo	Starts closed. Optional English + Arabic for this chapter only. Leave closed to keep Sentences (or the site default).

> Writing sentences without uploading that Extra photo will not show the chapter. **Photo first, then text.**

5. Service list (you pick one)

Group on /projects	Service in Studio
Branding	Brand Identity · Packaging · Prints
Marketing	Social Media · Outdoors · Brand Strategy · Marketing Strategy
Photography & Videography	Photos · Videos
NFC (also on /nfc)	NFC Card · Ring · Medal

6. Extra photo chapters by service

Use the matching chapter name. Videos have no extra photos — cover film only.

Service	Extra chapters (in order)
Brand Identity	Logo, Brand book, Packaging, Business card, Environmental
Packaging	Another SKU, Detail, In hand, On shelf
Prints	Bag, Letterhead, Poster
Social Media	Story, Campaign
Outdoors	City, Vehicle

Service	Extra chapters (in order)
Brand Strategy	Now, Horizon, Path
Marketing Strategy	Budget, Time, Mix
Photos	Portrait, Detail, Wide
Videos	None — cover video (+ thumbnail) only
NFC Card	Back, In hand
Ring	On hand, Detail
Medal	Worn, Detail

7. How to edit a project

1. Studio → **Projects**.
2. Click the project (use search if the list is long).
3. Change only what you need — name, service, cover, order, description, extra photos, or sentences.
4. Click **Publish**.
5. Check `/projects` and the journey. If it is NFC, check `/nfc` too.

> If you change **Service** after photos are already there, open every Extra photo and re-check **This photo is for**. Chapters for Identity are not the same as Packaging or NFC.

8. How to delete a project

1. Open the project.
2. Click the ⋯ at the **top right** of the document (next to the X).
3. Click **Delete**, then confirm.

The case leaves `/projects`. If it was NFC, it also leaves the NFC examples grid. Keyboard shortcut: **Ctrl+Alt+D**.

You cannot delete Homepage, About, NFC page, Store page, or Intro & showreel. Those pages must stay.

9. Homepage

The home page is two documents. You only edit them — you never create a new one.

Intro & showreel

Field	What it is	If empty
Homepage intro loop	Video behind the home hero	Default intro video

Field	What it is	If empty
Intro poster	Still image before the intro loads	Default still
Showreel video	Film in the hero player	Default intro video
Showreel eyebrow / title (EN + AR)	Text on the showreel	Default words

Homepage document — groups at the top of the form

Group	What you can change	What you cannot
Hero	Studio pill, hero title, hero description (EN+AR). In the description keep the brand as `<1>Sign Up</1>` so it stays green. Partner logos: name + logo upload or URL.	If you add any partner logo, the old logo strip is replaced. Leave the list empty to keep the current logos.
Stats	The four numbers: years, clients, campaigns, satisfaction.	Labels, icons, + / % signs.
About / Vision	Titles and body for Who we are, What makes us different, Vision, Mission (EN+AR).	Button destination and panel layout.
Process	Main title/description, then Discover / Strategy / Execute / Optimize title + text.	A fifth step. Deliverable lists under each step.
Services	Eyebrow, title, then Service 1 through Service 6 (title, description, tag, stat).	A seventh service, videos, posters, or layout.

Contact block, results chart, navbar, and footer are not in Studio.

10. About page

Field	What it is
Hero eyebrow / title / description	Top of the About page (EN+AR)
Hero years / clients / campaigns numbers	The three numbers in the hero
What is Signup — eyebrow / title / body	The “what is Sign Up” block
Founder eyebrow / name / role / bio / photo	Founder section. Photo upload or URL
Milestones	Value + label (EN+AR) for each milestone

You cannot change the About page layout from Studio.

11. NFC page

Field	What it is
Eyebrow / Title / Description	Top of `/nfc` (EN+AR)
Store button label	Words on the green button. The button always opens `/store`

Field	What it is
Store button hint	Small line under that button
Stand kicker / title / body / photo	Stand block text and photo (upload or URL)
Card / Ring / Medal kicker, title, body, photo	The three product blocks
Card / Ring / Medal examples	Up to 2 projects under each shape. Picker only shows matching Projects

> If an examples list is empty, the site shows the first two projects of that type by Order.
> All NFC work still appears on `/projects`. Choosing examples here does not hide a case from Projects.

12. Store page

The shop has a **fixed set of 12 tiles**. Adding a Project does **not** add a shop tile.

Field	What it is
Eyebrow / Title	Top of `/store`
Quote button label	Label on the WhatsApp button
Filter: All / Identity / Strategy / Campaign / Capture / NFC	Names of the filter chips
Catalog tiles	Each of the 12 products: Title, Line (EN+AR), Photo or URL

Clear a tile field to restore the built-in photo or sentence. You cannot add a 13th tile, remove a tile, change the lookbook layout, or change the WhatsApp number.

13. English and Arabic

Most text fields have English and Arabic. Fill both when you replace a default.

If only one language is filled, the site may copy the other language, then fall back to the built-in default. Do not publish an English-only change and expect Arabic to keep the old default for that same field.

14. Before you Publish

New project

- Name + Service + Cover
- Extra photos only for chapters you want live
- **This photo is for** matches the service

- English + Arabic if you are not using defaults
- Publish, then check `/projects` (and `/nfc` if NFC)

If something does not show on the site

- Did you click **Publish**? Drafts stay invisible.
- Does that chapter have an Extra photo?
- Are you looking at the same Service filter as the project?
- Empty text fields use defaults on purpose — that is normal.

15. Can I…?

Task	In Studio?
Add a Brand Identity / Packaging / NFC case	Yes — Create a Project
Change photos or sentences later	Yes — open the Project and Publish
Reorder cases on /projects	Yes — Order on Projects page
Delete a case	Yes — ⋯ → Delete
Add a new service type (for example Events)	No
Change journey layout or animation	No
Add a seventh home service	No
Change home intro / showreel video	Yes — Intro & showreel
Change hero title and partner logos	Yes — Homepage
Change NFC headings or product photos	Yes — NFC page
Choose which 1–2 cases sit under each NFC shape	Yes — NFC page examples
Point the NFC store button somewhere else	No — always /store
Change /store tile photos or titles	Yes — Store page
Add or remove a shop tile	No — 12 tiles are fixed
Change the WhatsApp number	No
Change navbar, footer, or colors	No
