

Sign Up CMS handbook (Sanity)

Use this document to add work, edit the homepage, and know what you can change in **Create** vs **Update**.

Studio URL: `/studio` (local: `http://localhost:3000/studio`).

After every change, click **Publish**. An empty field keeps the site's default English/Arabic sentence. It does not delete the section.

1. What Sanity controls (and what it does not)

In Sanity	Not in Sanity
Work cases (Projects) on <code>/projects</code>	The shop catalog on <code>/store</code> (WhatsApp products, photos, filters)
NFC work grids on <code>/nfc</code> (up to 2 examples per shape, picked on NFC page)	Fixed NFC product stills (card, ring, medal, default stand photo)
Homepage copy, stats numbers, partner logos	Homepage contact block, results chart, service-section videos
Intro loop + showreel videos	Navbar, footer, colors, routes
About page copy	About page layout
NFC page titles/body, store-button label , hint, optional stand photo	NFC store-button destination (always <code>/store</code>)
	Journey layout (chapter design is code)
	New service categories (the type list is fixed)

The shop (`/store`) is a fixed catalog. Adding a Project does **not** add a shop tile.

2. Studio sidebar

Item	Kind	Create a second one?
Intro & showreel	One document	No — update only
Homepage	One document	No — update only
About	One document	No — update only
NFC page	One document	No — update only
Projects	Many documents	Yes — one document per case

Open **Projects** to add or edit work. Open the four items above only to edit existing page copy/media.

How to create a project

Do this when you have a new case to put on `/projects` (and on `/nfc` if it is NFC).

1. Open `/studio` and sign in.
2. In the left sidebar, click **Projects**.
3. Click **Create** (top right). A new empty project opens. Do not open **Homepage** for this.
4. Fill **Project name**.
5. Set **Service** to the category (Brand Identity, Packaging, NFC Card, ...). See the category table in section 3. You cannot type a new service.
6. In **Cover**, click upload and add the opening photo. If **Service** is **Videos**, upload the film here instead (and add **Video thumbnail** if you have a still).
 - Or paste a URL in **Or paste a URL** if the file is already online.
7. Optional: **Short description** (one or two lines under the name). Leave empty to keep the default line.
8. Optional: **Order on Projects page**. Smaller number = higher in the list.
9. Optional: under **Extra photos**, click **Add item** for each extra chapter:
 1. Set **This photo is for** to the matching slot (Logo, In hand, ...).
 2. Upload the photo (or paste a URL).
 3. Optional: photo label and EN/AR sentences for that chapter.
10. Optional: open **Sentences** and fill English + Arabic only where you want to replace the default text.
11. Click **Publish** (bottom left / document menu). Save without Publish stays a draft and does not show on the site.
12. Open the live site: `/projects`, pick the same filter as **Service**. Click the card and check the journey. If Service is NFC Card / Ring / Medal, also check `/nfc`.

Minimum to publish: name + service + cover.

How to update a project

Do this when the case already exists and you need to change name, photos, order, or sentences.

1. Open `/studio` → **Projects**.
2. Click the project in the list (search by name if the list is long).
3. Edit only the fields you need:
 - **Project name** — changes the title on `/projects` and on the journey.
 - **Service** — moves it to another filter. After this, re-check every Extra photo **This photo is for** (slots change with the service).
 - **Cover** — replace the opening image/video.
 - **Order on Projects page** — reorder the list.
 - **Short description** — change or clear it (clear = default line comes back).
 - **Extra photos** — **Add item** for a new chapter; open an item to replace the file or slot; remove an item to drop that chapter from the page.
 - **Sentences** — change EN/AR, or clear a field to restore the default sentence.
4. Click **Publish**. The live page updates after publish, not after typing.
5. Check the same URLs as create: `/projects` + journey, and `/nfc` if it is NFC.

To delete a project: open it → document menu (...) → **Delete** → confirm → the case leaves `/projects` (and `/nfc` if it was NFC).

You cannot add a new service type, change journey layout, or send the case to `/store` from Update.

How to update the homepage

The homepage is **not** created. There is one Homepage and one Intro document. You only update them.

A. Videos (intro loop + showreel)

- 1. Open /studio → Intro & showreel.
- 2. Homepage intro loop — upload a video or paste a URL. This plays behind the hero.
- 3. Intro poster — still shown before the intro loads.
- 4. Showreel video — the film in the hero player.
- 5. Showreel eyebrow / title — English and Arabic text on the showreel.
- 6. Click Publish.
- 7. Open / and check the hero background and the showreel.

Empty video fields fall back to /videos/intro.mp4 .

B. Text, numbers, partners, services

- 1. Open /studio → Homepage. Do not click Create.
- 2. Use the groups at the top of the form: Hero, Stats, About / Vision, Process, Services.
- 3. Hero
 - Edit studio pill, title, description (EN + AR).
 - In the description, keep the brand name as <1>Sign Up</1> so it stays green.
 - Partner logos: Add item for each partner (name + logo upload or URL). If you add any logo, the built-in ticker is replaced. Leave the list empty to keep the current default logos.
- 4. Stats — change the four numbers only (years, clients, campaigns, satisfaction). Labels and icons stay as they are.
- 5. About / Vision — edit titles and body for Who we are, What makes us different, Vision, Mission (EN + AR).
- 6. Process — edit the main title/description, then Discover / Strategy / Execute / Optimize title + text. Do not try to add a fifth step.
- 7. Services — edit eyebrow, title, then Service 1 through Service 6 (title, description, tag, stat). Do not add a seventh service.
- 8. Click Publish.
- 9. Open / in English and Arabic and scroll the whole page.

Homepage — you cannot: add/remove sections, change Contact or the results chart, change service videos/posters, change navbar/footer, or create a second Homepage.

3. Categories (Service field)

3.1 Categories (Service field)

You cannot invent a new service. Pick one of these:

Branding (filter on /projects)

Service in Studio	Appears as
Brand Identity	Brand Identity
Packaging	Packaging
Prints	Prints

Marketing

Service in Studio	Appears as
-------------------	------------

Social Media	Social Media
Outdoors	Outdoors
Brand Strategy	Brand Strategy
Marketing Strategy	Marketing Strategy

Photography & Videography

Service in Studio	Appears as
Photos	Photos
Videos	Videos

NFC (also listed under the matching block on `/nfc`)

Service in Studio	Appears as
NFC Card	NFC Card
Ring	Ring
Medal	Medal

4. Create vs Update — Projects

4.1 Create — required

Field	Rule
Project name	Required
Service	Required. This is the category.
Cover	Required. Upload an image, or a video if Service is Videos . You may paste a URL instead of uploading.

Without these three, do not publish.

4.2 Create — optional

Field	What it does	If left empty
Short description	One or two lines under the name on the live page	Default line for that service
Order on Projects page	Smaller number appears first in the list	ø. This does not add photos or chapters
Video thumbnail	Still shown before a film plays	Only for Videos . Hidden for other types

Extra photos	Each photo is one extra chapter on the journey	That chapter does not appear
Sentences	Cover line, chapter headlines, labels (English + Arabic)	Default sentences

Extra photo fields

Field	What it does
This photo is for	Pick the chapter slot for this service (Logo, In hand, ...). If empty, the next empty slot for this service is used
Photo label	Small label on the photo. Not the chapter headline
Upload	Image (or URL). Required for that extra item
Small line / Headline / Paragraph	Optional EN+AR override for that chapter

Rule: **no extra photo = that chapter stays off the page**, even if you wrote sentences for it.

4.3 Create — what you cannot do

- Add a service that is not in the list
- Change how many chapters a service is allowed to have
- Change the journey layout (scrolling design, frames, motion)
- Put the case into `/store`
- Change WhatsApp, navbar, or routes

4.4 Update — what you can change

You can change every field from Create:

- Name, service, cover, order, short description
- Extra photos (add, replace, remove, change slot)
- Sentences (EN and AR)
- Video thumbnail (Videos only)

Then **Publish**.

If you change **Service** after photos already exist, re-check **This photo is for**. Slots belong to the new service (Identity slots are not the same as Packaging or NFC).

4.5 Update — what you cannot change

Same limits as Create: no new categories, no layout change, no shop tile, no new homepage sections.

Deleting a project in Studio removes it from `/projects` (and from `/nfc` work grids if it was NFC). Publish is still required.

5. Extra photo slots by service

Use the matching slot. Extra photos without a slot are assigned to the next empty slot automatically.

Service	Slots (in order)
Brand Identity	Logo, Brand book, Packaging, Business card, Environmental
Packaging	Another SKU, Detail, In hand, On shelf
Prints	Bag, Letterhead, Poster
Social Media	Story, Campaign
Outdoors	City, Vehicle
Brand Strategy	Now, Horizon, Path
Marketing Strategy	Budget, Time, Mix
Photos	Portrait, Detail, Wide
Videos	None — cover video (+ thumbnail) only
NFC Card	Back, In hand
Ring	On hand, Detail
Medal	Worn, Detail

Sentences that appear only for some services

Service	Extra sentence fields
Brand Identity	Cover line, Logo chapter, Brand book chapter, labels for Packaging / Business card / Environmental (in that order)
Packaging	Detail chapter, grid label (Another SKU / In hand / On shelf)
Brand Strategy / Marketing Strategy	Up to three steps, same order as the extra photos
NFC Card / Ring / Medal	Wear line (small line above the cover)
Other types	Cover line (and per-photo lines if you fill them)

6. Homepage

There are **two** Studio documents for the home page. Both are update-only.

6.1 Intro & showreel

Field	Live place	If empty
Homepage intro loop	Video behind the hero	/videos/intro.mp4
Intro poster	Still before the intro loads	Site default still
Showreel video	Hero showreel player	/videos/intro.mp4

Showreel eyebrow / title (EN + AR)	Text on the showreel	Built-in defaults
------------------------------------	----------------------	-------------------

6.2 Homepage document

Groups in the form: **Hero, Stats, About / Vision, Process, Services.**

Hero — you can change

- Studio pill
- Hero title (EN + AR)
- Hero description (EN + AR). Wrap the brand name as `<1>Sign Up</1>` so it stays green
- Partner logos (name + image or URL)

If **Partner logos** has at least one logo with an image/URL, it **replaces** the built-in partner ticker. If the list is empty, the built-in logos stay.

Stats — you can change

Numbers only:

- Years of experience
- Clients
- Campaigns
- Satisfaction

You cannot change labels, icons, "+" / "%" suffixes, or the highlight row under the numbers.

About / Vision — you can change

Titles and body copy for:

- Who we are
- What makes us different
- Vision
- Mission

You cannot change the CTA button target or the panel structure.

Process — you can change

- Process title and description
- Title + text for Discover, Strategy, Execute, Optimize

You cannot add a fifth step. Deliverable lists under each step stay on the default translations.

Services (home) — you can change

- Services eyebrow and title
- **Service 1 ... Service 6** only: title, description, tag, stat

You cannot add Service 7 or remove a slot. Layout (left/right, video, poster `sign3.jpg`, video file) is not in Sanity.

The CTA always goes to `/projects`.

6.3 Homepage — what you cannot change

- Contact section
- Results chart
- Number of process steps (always 4)

- Number of service blocks (always 6)
- Navbar / footer
- Page order of sections

7. Create vs Update — page documents (Homepage, About, NFC, Intro)

Action	Projects	Homepage / About / NFC page / Intro & showreel
Create a new document	Yes	No
Update the existing document	Yes	Yes
Leave a field empty	Default copy/media	Default copy/media
Add a new site section or category	No	No
Duplicate the homepage	—	No

There is only one Homepage, one About, one NFC page, one Intro document. Edit that document; do not try to create another.

8. Other pages in Studio

About

You can update: hero eyebrow/title/description, hero numbers (years / clients / campaigns), “What is Signup” copy, founder name/role/bio/photo, milestones (value + label, EN + AR).

You cannot change the page layout from Studio.

NFC page

You can update: hero eyebrow/title/description; **Store button label** (English + Arabic); **Store button hint**; stand kicker/title/body; **Stand photo** (upload or URL); card / ring / medal kicker, title, body; **Card / Ring / Medal examples** (up to 2 Projects each).

If a stand photo (or URL) is set, it replaces the default stand image. If empty, the site default stand is used.

Under each NFC shape, `/nfc` shows **at most two** example cases. Pick them here (Card examples / Ring examples / Medal examples). The picker only lists Projects whose Service matches that shape.

If an examples list is empty, the site shows the first two Projects of that Service by **Order**. If there are none, that shape has no work grid.

All NFC cases still appear on `/projects` under NFC Services. Changing examples on this document does not hide a case from `/projects`.

The green button on `/nfc` always opens `/store`. In Studio you only change the words on the button (defaults: “Open the store” / «روح على المتجر») and the small hint under it. You cannot point that button at `nfc.signuptap.com` or anywhere else.

If those two fields are empty, the site uses the built-in defaults above.

9. English and Arabic

Most copy fields are **English + Arabic**. Fill both when you override a default.

If only one language is filled, the site may fall back to the other language, then to the built-in default.

Do not leave a published override in one language and expect the other language to stay on the old default for that same field — fill both.

10. Publish checklist

New project

- ☐ Name + Service + Cover
- ☐ Extra photos only for chapters you want live
- ☐ Slot (This photo is for) matches the service
- ☐ EN + AR sentences if you are not using defaults
- ☐ **Publish**
- ☐ Check /projects and the correct filter
- ☐ If NFC: check /nfc work grid under that shape

Homepage

- ☐ Edit **Homepage** and/or **Intro & showreel**
- ☐ Partner logos: either a full new list, or leave empty to keep defaults
- ☐ Services: still exactly six blocks
- ☐ **Publish**
- ☐ Check / in English and Arabic

If something does not show

- Confirm **Publish** (not only Save/draft)
- Confirm the extra photo exists for that chapter
- Confirm Service type matches the filter you are looking at
- Empty text fields intentionally use defaults — that is expected

11. Quick “can I?” list

Task	In Studio?
Add a Brand Identity / Packaging / NFC case	Yes — Create Project
Change a case’s photos or sentences later	Yes — Update Project
Reorder cases on /projects	Yes — Order on Projects page
Delete a case	Yes — delete the Project document
Add a seventh home service	No

Add a new service type (e.g. "Events")	No
Add a shop product on /store	No
Change WhatsApp number	No
Change intro / showreel video	Yes — Intro & showreel
Change hero title and partner logos	Yes — Homepage
Change NFC page headings	Yes — NFC page
Change /nfc store-button label or hint	Yes — NFC page (Store button label / Store button hint)
Choose which 1–2 cases show under each NFC shape	Yes — NFC page (Card / Ring / Medal examples)
Change where that button goes	No — always /store
Change NFC product stills (card/ring/medal photos)	No
Change journey animation/layout	No
